INDONESIAN JOURNAL OF MATERIALS SCIENCE

Vol. 20, No 2, January 2019

PREFACE

We would like to present, with great pleasure, Indonesian Journal of Materials Science Vol. 20, No. 2, January 2019. This journal presents 7 (seven) papers with titled: Thermal Decomposition Kinetics of Lanthanum Oxalate Hydrate Product Treatment from Monazite; Utilisation of Slag Powder for Cement Substitution Based on The Compressive Strength and Penetration of Chloride Ions; Utilization of Indonesian Local Stannic Chloride (SnCl_4) Precursor In The Process of Making Fluorine- Doped Tin Oxide (FTO) Conductive Glass; Synthesis and Characterization of $\text{Li}_4\text{Ti}_5\text{O}_{12}$ With Sol Gel Method As A Lithium Ion-Battery Anode Material; The Potential of Indonesian Graphite as RDE Fuel Matrix; The Effect of Calcination on Microwave Absorbing Properties Of $\text{Fe}_3\text{O}_4/\text{TiO}_2$ Composite; and Study of Ceria Stabilized Zirconia Microspheres Morphology by Small-Angle Scattering and Microscopy. This journal was founded to represent the growing needs of material science research, now widely recognized as an integral part of scientific and characterization investigations.

We are certain that it will be followed by many others, reporting new developments in the material science field. This issue would not have been possible without the great support of the Editorial Board and secretariat members, and we would like to express our sincere thanks to all of them.

Finally, all the editorial boards conveyed the support of the writers and reviewers, so that the Indonesian Journal of Material Science could display articles on quality research and development materials that are expected to contribute to the development of materials science.

Editor in Chief
